

Unable to return formula on the last day of the month in Spirit Utilities

If there is a need to return formula on the last day of the month use attachment 21 in the State Plan and scan it into the participant folder. Please take into consideration that this is the last of the month, and that we should only be issuing enough for the current period, one day.

The next day (first day of the month) the participant will be eligible for a whole month food package.
